WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Two sills: RHS 100 x 50 x 3, 1,150 mm; centres 600 mm apart.

Six crossbars SHS 50 x 50 x 3, 550 mm, tops flush.

Centres from the joint end: 35, 220, 480, 680, 920 and 1,125 mm. The 220 and 480 mm bars carry the blower plate; the 680 and 920 mm bars the engine plate.

Joint plates as the span module, at the joint end: 10 mm, 150 x 170 mm, four 18 mm holes drilled with the span module's plates clamped to them, so the holes line up.

Far end: a 3 mm cap over each sill end.

Weld on a flat table, diagonals equal within 2 mm.

Check: bolt it to the span module dry; the sill tops line up within 2 mm across the joint.
