P1	Making sketch for the prototype build plan	2026-10-03	AC

HOW TO MAKE IT AND HOW IT FITS

25 mm reinforcing bar, 830 mm long; grind one end to a point.
Washer: 50 mm disc of 6 mm plate, 26 mm hole.
Slide the washer on; weld it, underside 30 mm below the top.
Drill each sleeper with a 28 mm hole, 400 mm each side of its middle, before setting it out.
Drive the stake through the sleeper until the washer bears on the timber: 700 mm goes into the ground.
In rock or hard laterite, drill a pilot hole first.
Check: the stake does not move when pulled by hand.
