WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate: 10 mm, 220 mm across, 30 mm bore with keyway.

Twelve teeth: notches 16 mm deep and 14 mm wide, every

30 degrees, the steep face leading in the pumping

direction, so the pawl drops in if the wheel runs back.

Hub: tube 60 mm OD, 20 mm long, bored 30 mm with the

same keyway, welded to the face toward the wheel.

Grind the tooth faces square and remove burrs.

Check: the pawl nose sits fully in every notch.
