WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 8 mm, 340 x 400 mm (400 across the frame).

Four slots 14 mm wide, 60 mm long, along the frame,

over the crossbars 680 and 920 mm from the joint end,

40 mm in from the front edge and 40 mm from the back.

M12 bolts through the slots into the crossbars (drill

the crossbars through the slot middles).

Engine holes: mark from the engine's own base, so the

shaft sits 150 mm above the plate, crankshaft toward

the belt side, square to the frame.

Check: the plate slides 60 mm along the frame to

tension the engine belt.
