WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 8 mm, 190 x 200 mm, lying across the two crossbars either side of the shaft centre.

42 mm hole for the rising main, 95 mm from the pump-end edge and 100 mm from the front edge.

Clamp: 70 mm tube, 30 mm long, bored 40 mm, sawn in two and bolted round the main with two M8 bolts; one half welded to the plate over the hole.

M12 eye bolt underneath, 55 mm in front of the hole, for the support wire.

Four M10 bolts to the crossbars.

Check: the main hangs plumb in the middle of the hole.
