WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Box of 6 mm plate, 200 x 120 x 300 mm tall.

Top holes: 40 mm for the main, 20 mm for the rope down run, 80 mm apart; a 52 mm socket 60 mm tall over the main hole.

Four slots 20 x 100 mm in each long side let water in.

Roller: HDPE 74 mm across, 60 mm long, on a 12 mm stainless pin through both long sides, 80 mm up from the bottom; rope runs round it.

Weights: two 25 mm steel plates 160 x 230 mm, about 7 kg each, bolted to the long sides.

Eye on top for the support wire.

Check: the rope runs round the roller and up the socket without rubbing the box.
