WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Disc 35 mm across, 10 mm thick, from HDPE sheet.
6.5 mm hole in the middle for the 6 mm rope.
Light chamfer on the top edge so it enters the pipe.
Hold each piston with a knot under it; one every metre.
Deeper bands use smaller pistons: 27 mm for the 32 mm main, 20 mm for the 25 mm main (1 mm clear in the bore).
Check: each piston slides through a 1 m test length of the main with a light, even drag.
