WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Saddle: 50 mm plate block 140 mm across, 22 mm tall, cut to a 100 mm radius on top to cradle the duct bend.
Weld the saddle on the crossbar 2,070 mm from the pump end of the span module.
Strap: 30 x 3 mm flat bar bent round the duct with feet down to the crossbar, an M8 bolt each side.
Check: the duct head sits level and does not rock.
