HOW TO MAKE IT AND HOW IT FITS

Pipe: 40 mm nominal (48.3 mm OD) galvanised, about 5.0 m, in two lengths joined with a socket.

Bend: 90 degrees, 120 mm radius, threaded or welded.

Riser: about 1.8 m, so the outlet is 2.4 m above the ground.

Cap: 140 mm disc on three 6 mm legs 50 mm tall, welded to the riser top: rain kept out, gas let out.

Pipe end at the engine: fits the 0.3 m stainless flexible hose with a band clamp.

Grind off zinc before any weld; weld outdoors.

Check: the outlet is at least 6 m from the collar edge and from the blower intake.
